

Gabrielle Gobira Felsky Soratto

Software Developer · Mobile & Backend

Campo Mourão, PR, Brazil · Remote · devgabriellesoratto@gmail.com · +55 44 99741-8687
linkedin.com/in/gabrielle-felsky-soratto · github.com/GabGFS · App Store Developer

PROFESSIONAL SUMMARY

Software Developer in career transition, with a background in Psychology and People Management. Mobile app (Quiz Bíblico) published on the Apple App Store with distributed architecture (Flutter + Kotlin/Spring Boot + AWS), ~5% conversion rate and ~44% active user retention.

Main focus on mobile development with Flutter and backend with Kotlin/Spring Boot. Knowledge of AWS services (S3, SQS, SNS, API Gateway, Lambda, ECS), Docker, and Terraform, with AWS certification in progress. Advanced English (C1). Completing a degree in Systems Analysis and Development.

FEATURED PROJECT

Bíblia Game App — Bible Quiz published on the Apple App Store

Personal project · Mar 2025 - Present · github.com/GabGFS/biblia-game-app

- **What it is:** Mobile Bible Quiz app with distributed architecture, developed end-to-end — from conception and design to App Store publication and metrics monitoring.
- **Architecture:** Flutter client communicating with Kotlin/Spring Boot backend via REST API documented with Swagger/OpenAPI. Object-oriented modeling with layered separation (Data, Domain, Presentation on mobile; Adapters, Ports, Application, Domain on backend) for testability and maintainability.
- **Infrastructure:** Backend containerized with Docker, deployed on AWS with infrastructure provisioned via Terraform. File storage on S3, asynchronous processing with SQS, notifications via SNS, endpoints exposed via API Gateway.
- **Quality:** Unit and integration tests on both layers (Flutter: widget tests, unit tests; Kotlin: JUnit, MockK). Authentication and authorization implemented in the API.
- **Result:** App published on the App Store with ~5% conversion rate (impression to download) and ~44% active user retention. Metrics monitoring via App Store Connect for product decisions. Open-source code on GitHub.

OTHER PROJECTS

Management System for Psychology Clinic

Freelance (real client) · 2025

- Full web system for a psychology clinic (partnership of two professionals). Institutional landing page (clinic history, psychologists' profiles, specialties, address, photo gallery) + scheduling system with service selection, date and time, and automatic client notification via message. React (frontend) + Node.js/Express (backend) + SQLite.

Institutional Website — MGLife Health Consulting

Freelance (real client) · 2024-2025 · github.com/GabGFS/mglife

- Institutional website developed for a health consulting firm. HTML, JavaScript, CSS, SASS/SCSS, Tailwind CSS, and Bootstrap. Project completed and delivered to the client. Source code available on GitHub.

Study and Portfolio Projects

Personal · 2024-2025

- 2 games, 2 responsive websites, and 1 additional mobile app as learning exercises, covering React, Angular, Vue.js, Next.js, NestJS, and multiple backend languages (Java, Python, PHP). Available on GitHub.

PROFESSIONAL EXPERIENCE

Projects and Community Operations Analyst (Contractor)

Vento · Sep 2025 - Present

- Process automation and optimization through data collection, processing, and analysis to support product and business decisions.

- Maintenance and management of databases in Google Sheets and Airtable, ensuring data integrity.
- Definition and tracking of user acquisition, activation, and retention metrics, contributing to a data-driven product strategy.
- Community management through Brevo, a marketing automation and CRM tool.
- Cross-functional support across Product, Projects, and Commercial teams using agile methodologies (Scrum, Kanban).

Recruitment and Selection Analyst

COAMO Agroindustrial Cooperative · May 2023 - May 2025

- End-to-end recruitment processes with data-driven decision making. Process optimization and stakeholder communication across multiple business units. Background that contributes to user empathy and product vision in the software context.

Administrative Assistant / HR Apprentice

COAMO (Dec 2022 - May 2023) · Olmix - Multinational (Jan 2021 - May 2021)

- Administrative operations, document management, and corporate processes.

TECHNICAL SKILLS

Main focus	Flutter (Dart), Kotlin, Spring Boot, AWS
Mobile	Flutter (Clean Arch, BLoC/Provider), SwiftUI (basic)
Backend	Kotlin/Spring Boot, Node.js, Express, NestJS, REST APIs, Swagger
Cloud / Infra	AWS (S3, SQS, SNS, API Gateway, Lambda, ECS), Terraform, Docker
Languages	JavaScript, TypeScript, Dart, Kotlin, Java, Python, Swift, SQL
Frameworks & Styling	React, Angular, Vue.js, Next.js, HTML5, CSS3, SCSS/SASS, Tailwind CSS, Bootstrap
Databases	MySQL, MongoDB, SQLite
Testing	JUnit, MockK, Mockito, Flutter widget/unit tests, TDD
Patterns	OOP, Clean Architecture, SOLID, Repository Pattern, Dependency Injection
Tools	Git, GitHub, Docker Compose, Figma

EDUCATION

Systems Analysis and Development (in progress)

Centro Universitário Integrado, Campo Mourão · Expected: Jun 2027

MBA in People Management

Centro Universitário Integrado, Campo Mourão · Completed: Oct 2023

Bachelor's Degree in Psychology

UEM / Centro Universitário Integrado, Campo Mourão · Completed: Dec 2022
